## **Tactile Surfaces: Mixed Media Techniques for your Quilts**

**Instructor: Lisa Chipetine**

### **INTRODUCTION:**

**Approximate Supply Costs-\$70-85 dollars (depending on stash)**

**Working in a mixed media format is the equivalent to your first day in kindergarten, when you take out your cigar box with all your “tools”: crayons, paints, papers and glues and go to town making your “masterpiece”. This class is the same concept, with the exception that now you are an adult and the tools are more sophisticated and the effects more poignant.**

**This can be a messy, wet and sloppy process. It is really important not to wear anything that you don’t consider “disposable”.**

**I know that the attached supply list is extensive and may be considered daunting. Please do what is within your budget and what you are comfortable with. The attached list is the “optimum” list. It is only logical that the more materials you have, the more options you will have when you are creating. What you will receive in this class a one day “CRASH COURSE” in the overall aspects of mixed media.**

**I always encourage my students to be willing to share what you bring. We have ALL forgotten something for a class at one time or another,**

**or seen something on someone else's workspace that would make our piece "perfect".**
